

Pre-manuscript is closed

15 August 2026. This is **not** a finished paper. Evidence, claims, tables, figures, and the writer kit are frozen so Cheran can lead manuscript writing.

What we closed vs what we did not

Closed (pre-manuscript)	Not closed (manuscript phase)
Champion frozen · 0.9780±0.0033	Venue-ready PDF / Word / LaTeX
ToN corrected 0.8075 / 0.9626 · clean path INVALID	Full paper narrative / related work polish
Local B3 parity + sanitizers	Camera-ready typesetting
DICC historical tables · B3 Option B (no post-fix claim)	Optional later DICC rebench
Figures + tables from JSON	Author list, BibTeX, journal class
Cheran handoff + claim map + results index	Sending the Jul 22 manuscript PDF as current

Manuscript fragments (keep — they are not the paper)

CAD_CBA_v1_MANUSCRIPT.md is a working draft with numbers synced. **CAD_CBA_v1_MANUSCRIPT.pdf** (22 July) is **stale** — do not send it. Use **TABLES_FROM_ARTIFACTS.md** and **docs/manuscript/figures/** as table/figure sources.

Where to go next

1. Read **docs/PRE_MANUSCRIPT_INDEX.md** (this pack’s start page).
2. Send Cheran **docs/CHERAN_MANUSCRIPT_HANDOFF.md** + GitHub master (not the old PDF).
3. He writes the paper. You fact-check against **RESULTS_INDEX** and gate JSON.
